Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from West Technical High School: Building and Equipment With an Outline of the Course of Study The building, in the style of the French Renaissance, is a beautiful structure of dark shale brick, grey stone and terra cotta. The architect, Mr. F. S. Barnum, has succeeded in making this, as is ever essential in a school building, a glass building. The large amount of wall space given to glass, gives ample light without in any way detracting from the appearance of the building. Steel lockers throughout the building take the place of cloak rooms. The corridor floors are models of their kind. The telephone service reaches each room and is so wired that the office may communicate with all rooms at one time. A vacuum cleaning system which extends to every part of the building insures a clean school, free from dust. The boiler room contains a plant with a capacity of six hundred horse power. A complete light and power plant is installed. The fans deliver 171,000 cubic feet of air per minute, this fresh air being so distributed that each pupil is supplied with 54 cubic feet of fresh air per minute. This exceeds the hospital requirement of 50 cubic feet per minute. The air is moistened after being heated so that the proper amount of humidity is maintained. Foul air is taken out by a separate set of exhaust fans. The general plan of the main part of the building is in the form of the letter E. The ground floor of the building covers about two acres. There are four stories, a basement and sub-basement in the center portion. The other portions...
