## TRAUMA AND REGENERATION: SPECIAL SYMPOSIUM OF THE 9TH INTERNATIONAL CONGRESS OF NEUROPATHOLOGY, VIENNA, SEPTEMBER 1982

To get **Trauma and Regeneration: Special Symposium of the 9th International Congress of Neuropathology, Vienna, September 1982** eBook, you should access the web link under and save the document or have accessibility to additional information that are highly relevant to TRAUMA AND REGENERATION: SPECIAL SYMPOSIUM OF THE 9TH INTERNATIONAL CONGRESS OF NEUROPATHOLOGY, VIENNA, SEPTEMBER 1982 ebook.

Springer. Paperback. Book Condition: New. Paperback. 127 pages. Dimensions: 9.0in. x 6.0in. x 0.3in. The General Council of the International Society of Neuro pathology enthusiastically and unanimously endorsed the suggestion made by the Executive Committee----chaired by Professor Dr. Franz Seitelberger, Vienna-for the IXth International Congress of Neuropathology that one of the major symposia at that Congress should be on Trauma and Regeneration of the Central Nervous System. The reasons for this are not difficult to understand: non-missile head injury and its sequelae-often a permanently brain damaged young adult-is one of the major problems that has faced society for many decades, and is continuing to do so since relatively little progress appears to have been made in its prevention; and the hope is that experimentalists may be able to shed some light at least on the potential for regeneration in the central nervous system. These proceedings are the outcome of that very successful symposium held in Vienna in September 1982. The Society is most grateful to Allgemeine Unfallversicherungsanstalt (AUVA), Vienna, for their sponsorship. Of the four major presentations, two were on the subject of non missile head injury in man and experimental animals, and two dealt with recent developments in the field of regeneration. The former review the clinical features and their structural basis and establish that all of the major types of brain damage seen in man as a result of a non-missile head injury have now been reproduced by controlled angular acceleration of the head in subhuman primates without anything striking the head. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
