Brand New Book ***** Print on Demand *****.Excerpt from The Course of Study in the Mechanic-Arts The reader will undoubtedly note the use in this course of the term Mechanic-Arts. Although it is not commonly used in this sense it has been adopted, after careful reflection, as the most accurate caption that can be given to that department of manual work that uses the tools of the mechanic. Moreover, throughout the length and breadth of the course in this department, the pupils experience is of the mechanic or artisan type. The term Mechanic-Arts, therefore, has been adopted as the title for all the manual work that is conducted in the shops of the school. One other introductory word: So brief a statement as that which follows can deal only with the most important and fundamental of those general considerations that have governed the development of the mechanic-arts course in this school. Therefore, much that is generally understood to belong to the forms of manual training under discussion is left to the reader to supply. The mechanic-arts are pre-eminently the tool using arts. Their significance in the school is in direct relation to the part they have played in the development of man and civilization. That this significance is great is clear from the fact that the development of tools and the tool arts is wrapped up in and closely integrated with the development of all human interests, achievements, and endeavors.
