With a focus on hands-on learning, a large project is developed incrementally in relevant chapters to help explain new concepts as well as demonstrate how these concepts relate to material previously discussed.Programming with Java: A Multimedia Approach covers topics such as Java 2D classes, user-defined classes, inheritance, interfaces, exception handling, GUI programming, generics and collections, multithreaded programming, and more.TuringsCraft CodeLab access is available for adopting professors. Custom CodeLab: CodeLab is a web-based interactive programming exercise service that has been customized to accompany this text. It provides numerous short exercises, each focused on a particular programming idea or language construct. The student types in code and the system immediately judges its correctness, offering hints when the submission is incorrect.Instructor Resources:-Answers to End of Chapter Questions-Chapter Quizzes-PowerPoint Lecture Outlines.
