

From Infrastructure to Services: Trends in Monitoring Sustainable Water, Sanitation and Hygiene Services (Paperback)

By -

Practical Action Publishing, United Kingdom, 2015. Paperback. Book Condition: New. 230 x 154 mm. Language: English . Brand New Book. This book outlines the current trends and challenges in monitoring rural water and sanitation services, in particular at country level. From Infrastructure to Services reveals important breakthroughs in country-led and country-wide monitoring of rural and small towns water supplies. It presents a state-of-the-art of strengthening monitoring water supply and sanitation in developing countries. Now that the coverage of water and sanitation in developing countries is increasing rapidly, there is a pressing need to ensure the new services continue to work. Information and Communication Technologies (ICTs) play a part; concern about value for money in development finance and the need to protect huge investments in water and sanitation all add urgency to the task. This book is essential reading for program managers and policy makers in the water, sanitation, and hygiene sector, both in development agencies and government departments. It should also be read by researchers and students in the WASH sector.
