Not illustrated. 1910 Excerpt: . \$200 for chemistry, and \$200 for books, as against \$12,225 for salaries to men, not one of whom gives his whole time to medical education. At Halifax, the fee income is some \$5000 a year and the government makes an appropriation of \$1200, --a total of \$6200. The faculty apportions this sum as follows: three-fourths of the fees are divided among the teachers; one-fourth of the fees plus the government subsidy must carry all other expense, --heat, light, janitor service, laboratory maintenance: the disgraceful condition of the premises follows as a matter of course. The Hahnemann of Philadelphia, with estimated receipts of \$18,500, distributes \$11,000 among teaching practitioners and spends perhaps \$1500 on equipment and \$500 for laboratory material. Advertising and commencement exercises--the latter only another form of advertising--often cost these institutions more than their laboratories. One large eastern institution expends \$4700 on publicity, as against \$3500 on its laboratories; another--a New York school, this--\$1500 on publicity, \$1100 on laboratories; another, \$2100 on advertising, \$1160 on laboratories; another--this time in the south--\$1000 on advertising, \$500 on laboratories, including repairs. 1 The conclusion, then, is irresistible that these schools, far from being the benevolent enterprises that they are alleged to be, still pay, both directly and indirectly; nor can a genuine altruistic motive be made out for any medical school which does not consistently devote its entire income to providing decent facilities and adequate instruction in the laboratories, where the teachers, if competent, must rely wholly on their...
